

GUIDING PRINCIPLES

Intercultural Competence

Our school actively promotes intercultural and language exchange by establishing links with external partners in Russia and abroad, and is therefore part of a global learning community. We focus on providing a high level of competence in the German language, while offering the opportunity to learn Russian. We emphasise multilingual education to develop mutual respect, understanding and tolerance. We also support a proactive approach to discussing our shared history of the 20th century.

Social Skills

Social Skills
Our educational programme is based on liberal democratic values. We place particular emphasis on encouraging our students to develop intrinsic motivation, critical thinking, diligence and good manners. We also encourage independent thinking, teamwork skills, and a strong sense of responsibility for our environment and the well-being of all. Respect and open communication are the essence of our attitude. Social diversity is fully respected and valued in our school.

Methodological Skills

It is our goal to ensure that students master specific learning and working techniques through competence-based and interdisciplinary learning. We promote the ability to apply methods and learning techniques for acquiring, processing and presenting information. We also enable our students to participate actively in a democratic school culture and to develop competent and critical media literacy.

Professional Expertise

We aim to provide our students with a comprehensive level of competence in all school subjects and a sound general education. We combine subject and practical knowledge to ensure a holistic education, while maintaining and developing high standards through pedagogical quality management and the continuous training of our teaching staff.

Future Orientation

Our priority is to prepare our students for lifelong learning, which is essential in an increasingly complex world. We place particular emphasis on enhancing their creativity and capacity for innovation. We encourage our students to be reflective in their choice of studies and careers, and to take active social responsibility in modern society. We build on the wealth of experience of our alumni and encourage further collaboration and networking beyond the school years.
